Project Director and Full Stack Developer *with over 3 years of experience leading high-impact technology solutions. As* ***Project Director at SICCAAD****, I coordinated the platform's technical unification, optimizing delivery times by* ***40%*** *and web performance by* ***25%****. Founder of Latager, an academic optimization tool that manages more than* ***3,500 students****, demonstrating a strong ability to lead teams and projects from conception through large-scale rollout. Currently a* ***Software Development Intern at Liverpool****, building payment-transaction logic for new retail Point-of-Sale systems.*

PROFESSIONAL EXPERIENCE

Liverpool

Software Development Intern — *April 2026 - September 2026 (6-Month Internship)*

- **Joined a newly-formed Retail Engineering team** at Liverpool, building new in-store **Point-of-Sale (POS)** systems.
- **Focused on the payment transaction module**, developing and testing the logic that processes in-store payments end-to-end.

Latager Platform

Founder & Lead Developer — *Active Project*

- **Designed and deployed** a schedule optimization tool currently serving more than **3,500 active users** at UNAM.
- **Implemented real-time synchronization** and advanced schedule-comparison features using **React** and **Django REST Framework**, improving the efficiency of students' academic planning.
- *Managed hybrid data architectures* with **MySQL** to ensure data integrity and project scalability.

Multimedia and Internet Laboratory

Project Director / Full Stack Developer — *January 2024 - December 2025*

- **Directed the full life cycle of SICCAAD**, a comprehensive academic management platform for UNAM, coordinating development efforts to ensure an efficient delivery aligned with institutional goals.
- **Built Hexacode**, a web environment specialized in compiling and running assembly code (z80 and 8086), integrating **Lua** for logic processing and ensuring smooth execution in the browser.
- **Optimized service availability** through preventive and corrective server maintenance, ensuring platform stability under constant demand.
- **Improved user experience (UX)** through iterative updates and technical front-end maintenance, reducing friction in the tools' daily use.

Quality and Service in Pest

Full Stack Developer — *July 2025 - December 2025*

- **Developed the Full Stack architecture** of the corporate platform using **Django**, managing everything from server-side logic and the database to the user interface.
- Developed a chemical control module, enabling the administration and technical tracking of field applications.
- **Systematized automated staff report generation**, streamlining the delivery of inspection reports and facilitating the audit of completed services.

EDUCATION

National Autonomous University of Mexico (UNAM) — **Mexico City**

Computer Engineering — *2022 - 2027*

LANGUAGES

- English - B1 level
- Spanish - Native.

TECHNICAL KNOWLEDGE

- Python (intermediate, certified instructor)
- Django and Django REST framework (advanced)
- HTML, CSS and JavaScript (advanced, certified instructor)
- PostgreSQL, SQL Server and MySQL (basic)
- C language (basic)
- Java (basic)
- Git and GitHub
- React (intermediate)
- Vue (basic)
- Docker (intermediate)
- Assembler (intermediate)
- Lua (basic)
- Prompt Engineering and AI productivity tools

PERSONAL SKILLS

- Technical problem solving
- Self-management and self-taught learning.
- Effective communication within technical teams.
- Adaptability to new technologies.
